DESCRIPTION

RFI0316-2011 FOR AN ENTERPRISE SOCIAL NETWORKING PLATFORM

Telkom requires information regarding enterprise social network technology tool/software available; that needs to be established internally & externally for the employees of the Telkom Group, this include the subsidiaries (e.g. Telkom International) as currently do not have access to the Telkom systems. Telkom International includes MWEB Africa, MultiLinks, etc. therefore the content needs to be externally accessed via a secure network.

This social networking solution needs to allow employees to connect and communicate with one another. This solution need to allow:

- Team sites (team sites will consist of the several business units.
- My site (personalized by employees to upload pictures etc. Within stated parameters).
- Blogs.
- Expand newsletters solution with active commenting.
- Employees of the subsidiaries to also have access.

This communication channel represents a wonderful online channel for the company to increase brand exposure/awareness among its staff; with the spin-offs of external projection.
