Note: Messages will be played in the order of:
• New messages
• Saved messages
D. Other options

1. To change or suppress your secret code
   If you suppress your secret code, you do not have to enter a code when retrieving messages from your OWN phone.

Note: All the instructions in this booklet have been written as if your secret code has not been suppressed.

2. Message waiting indicator
   When you lift the handset and you hear an interrupted (stutter) dialling tone, you have new messages. If you hear the normal dialling tone, you do not have any new messages. This feature is standard and requires no programming.

   In order to use ForwardCall or BlockCall Plus, Call Answer has to be deactivated.

   Note: The Call Answer user instructions are available in five languages: English, Afrikaans, Zulu, Sesotho and Xhosa. Go to personal options and change to the language code of your choice.

Enhanced features available

Auto Callback – whilst retrieving messages from your phone, you can now return calls on a per message basis to the original calling number, or an alternative number of your choice. Call are charged at standard rates. This feature will, however, not be available to customers with BlockCall or BlockCall Plus.

How?
Dial 10120 from your own phone or 10121 from any other phone and follow the voice prompts.

Call Answer immediate – allows you to divert all calls automatically to your voice mailbox without the phone ringing, so you don’t have to be disturbed at all. This feature will ensure that all your calls are diverted to your voice mailbox.

How?
Press *64# to activate and press #64# to deactivate.

Greetings for busy and no reply conditions – customise your mailbox for busy and no reply conditions separately, so that callers can determine whether you are busy on the telephone or not available at all. This feature will ensure that the correct personal or standard greeting is played to the person calling you.

How?
Press *65# to receive messages while you are busy on the phone and #65# to deactivate, or Press *66# to receive messages when your telephone remains unanswered and #66# to deactivate.
D. Other options

1. To change or suppress your secret code
   If you suppress your secret code, you do not have to enter a code when retrieving messages from your OWN phone.

   **Note:** All the instructions in this booklet have been written as if your secret code has not been suppressed.

   **Enhanced features available**

   **Auto Callback** – whilst retrieving messages from your phone, you can now return calls on a per message basis to the original calling number, or an alternative number of your choice. Calls are charged at standard rates. This feature will, however, not be available to customers with BlockCall or BlockCall Plus.

   **How?**
   Dial 10120 from your own phone or 10121 from any other phone and follow the voice prompts.

   **Call Answer immediate** – allows you to divert all calls automatically to your voice mailbox without the phone ringing, so you don’t have to be disturbed at all. This feature will ensure that all your calls are diverted to your voice mailbox.

   **How?**
   Press *64# to activate and press #64# to deactivate.

   **Greetings for busy and no reply conditions** – customise your mailbox for busy and no reply conditions separately, so that callers can determine whether you are busy on the telephone or not available at all. This feature will ensure that the correct personal or standard greeting is played to the person calling you.

   **How?**
   Press *65# to receive messages while you are busy on the phone and #65# to deactivate, or Press *66# to receive messages when your telephone remains unanswered and #66# to deactivate.

2. Message waiting indicator
When you lift the handset and you hear an interrupted (stutter) dialling tone, you have new messages. If you hear the normal dialling tone, you do not have any new messages. This feature is standard and requires no programming.

In order to use **ForwardCall** or **BlockCall Plus**, **Call Answer** has to be deactivated.

**Note:** The Call Answer user instructions are available in five languages: English, Afrikaans, Zulu, Sesotho and Xhosa. Go to personal options and change to the language code of your choice.
Different number of rings option – enables you to set the number of rings before a call is forwarded to your voice mailbox. You now have the freedom to choose between 1 and 60 seconds, which translates to a maximum of 20 rings. Current standard setting is only 7 rings.

How?
Decide on the number of rings that you would like your phone to ring before the call is diverted to your voice mailbox. Press *67* followed by the number of seconds, followed by the # key. (See easy setup table)

Easy setup table (Number of seconds displayed on right)

<table>

Reminder service – remind yourself or others of important appointments and activities which need to be attended to, by programming voice messages in advance. Messages can be delivered to any fixed line or cellular number with a mailbox. Reminders can be sent to single or multiple recipients up to 31 days in advance. Reminder service will not be available to customers subscribing to BlockCall, BlockCall Plus or to suspended customers.

How?
Dial 10120 from your own phone or 10121 from any other phone and follow the voice prompts.

The IdentiCall Display screen or CLI telephone operates only if the IdentiCall network service has been activated by Telkom.

Telkom cannot be held responsible for non-display of certain numbers due to reasons beyond its control.

What you will you see on the display screen:

<table>
<thead>
<tr>
<th>Call Origin</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Areas where IdentiCall is supported if the caller has not restricted his/her number</td>
<td>Dialling code and telephone number of the caller, i.e. area code + 7-digit telephone number (a total of 10 digits, e.g. 012-555-1234)</td>
</tr>
<tr>
<td>A caller who has restricted the display of his/her number</td>
<td>PRIVATE</td>
</tr>
<tr>
<td>Areas where IdentiCall is not available</td>
<td>UNAVAILABLE</td>
</tr>
