

MetroLAN International Terms & Conditions

- The customer is limited to 30 MAC addresses per site. (This is an arbitrary number chosen to protect the memory space on the ME network as each box needs to keep all MAC addresses in it's tables).
- The customers are responsible for the installation, configuration and management of any Layer 3 services on their Metro LAN.
- The customer must be in the Metro Ethernet network footprint and have Optic Fibre to their premises . Feasibility study will be performed to determine infrastructure requirement and any Optic Fibre build will be recovered from the customer.
- A minimum service contract of 1 year is required.
-
